Arcing horns are projecting conductors used to protect insulators or switch hardware on high voltage electric power transmission systems from damage during lightning strikes and other

MM Powerline Transmission is one of the leading manufacturer and supplier of Single Tension

overvoltage phenomena. The Arcing horns (Rod Type) comprise a pair of rods having V-shaped outer ends criss crossing

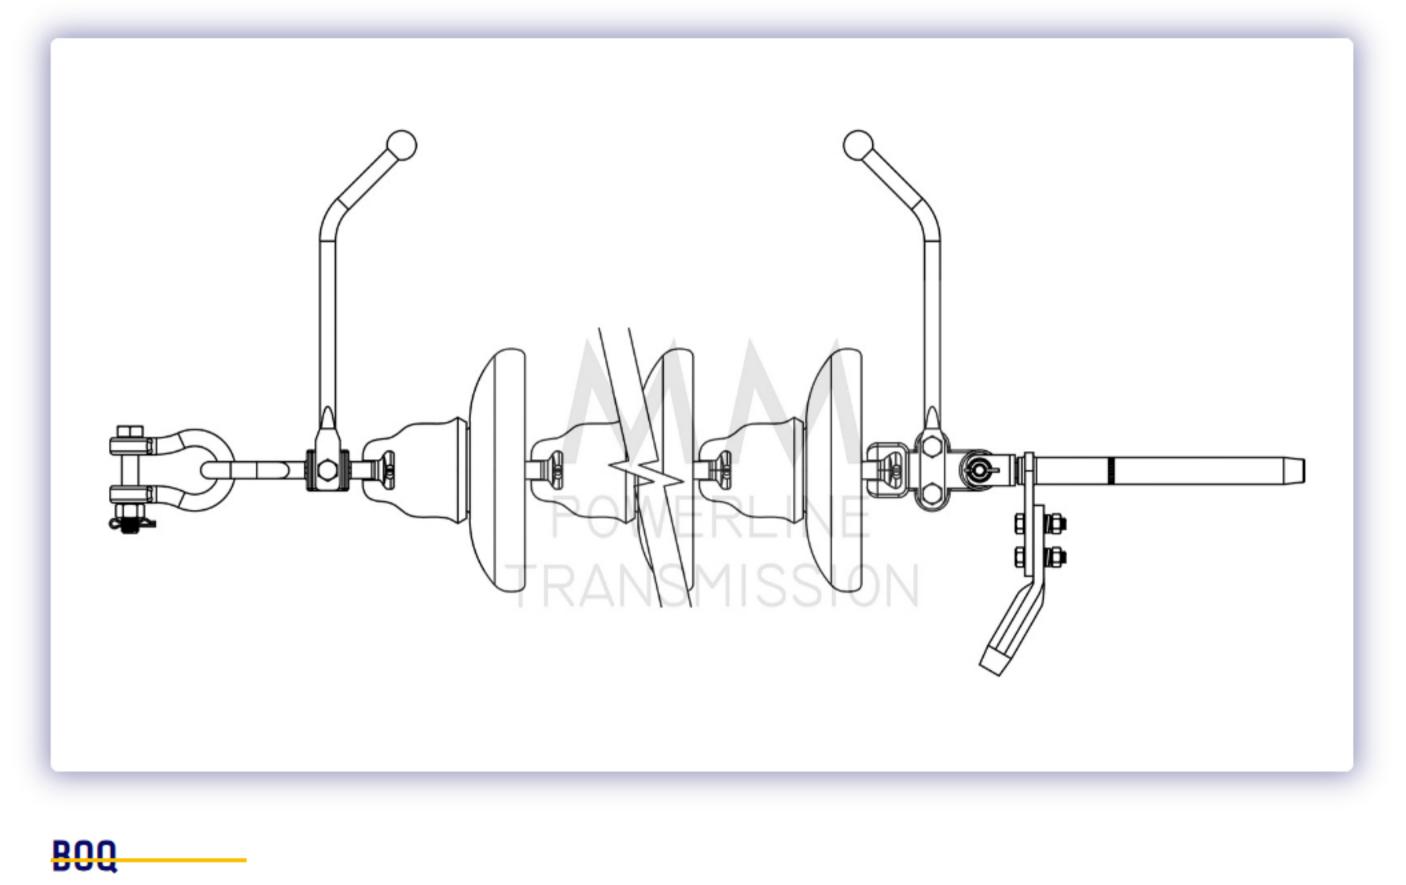

one another along one lateral side of the insulator and arranged to form multiple self-

extinguishing wiring gaps emanating from the common gap between the spaced apart apexes thereof. The assembly is eminently suited for installation vertically, horizontally or in an inclined position. The hardware components are identical and integral except for fasteners. Single Tension Compression Hardware can be used for Overhead Lines and Substations and can achieve the highest breaking load, using Compression connection techniques.

Compression Hardware ensures proper connection/fitting. It helps in reducing power loss, hence increasing the electrical conductivity. These are rust free, having longer life than Bolted

Single Tension Compression Hardware are easy to install.

In case of any fault/damage, only the damaged portion is required to change.

ECHNICAL DATA				

2. SLIP/MECHANICAL STRENGTH OF TENSION CLAMP: 95% OF UTS OF THE CONDUCTOR 3. BALL & SOCKET DESIGNATION: 16MM. AS PER I.S.: 2486, PART-II.

4. SPECN. TO WHICH H/W FITTING CONFORM – I.S.: 2486, PART-I.

1. U.T.S. OF HARDWARE FITTING: 90 KN.

- 5. ALL FERROUS PARTS (EXCEPT SPRING WASHER) SHALL BE HOT DIP GALVANISED CONFORMING TO I.S.: 2633 AND SPRING WASHER ELECTRO GALVANISED CONFORMING
- TO IS:1573, SERVICE COND. III 6. GENERAL TOLERANCE: ±3%.
- 8. TOLERANCE IN TOTAL LENGTH OF HARDWARE FITTING ±2%. 9. ELECTRICAL RESISTANCE OF TENSION CLAMP – NOT MORE THAN 75% OF
